JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

*An Abstract of a Letter from Liege concerning a
strange preservation of four Men in a Mine 24
days without any food, April 9. 84.*

SOME *Colliers* working in a *Cole-Pit* at *Herfjol* about half a League from *Lige* on our *Shrove Munday* Feb. . betwixt 7 and 8 in the morning, one of them peirced a *veine* of *water*, which gushing in violently drowned one, those that were near the mouth of the *Pit* were drawn out, but four of them being further within saved themselves upon a little ascent within the *Mine*, which has several *Lanes* or *Allies* in it, and were shut in by the *water* which stopt their passage out. 24 days were spent in drawing off the *water*, rather to render the *mine* useful again than out of any hopes of saving the men: at last on *Thursday* March the 9th. being the 25th of their confinement, *men* entred in, found these 4 alive, and drew them out and I my self among many others saw and examined them about these *articulars*: they had not a morsel of Bread with them, but lived on the *water* of a little *Fountain* which broke out by them: 2 *bottles* of which I caused to be *evaporated* to see if it were any thing extraordinary, and found nothing but a scarce perceptible *Calx* remaining.
